

You Don't Slow Me Down

Duke Special

You kiss me with little wings
I love your skin on my skin
Lying like water still and blue
Lamp light and juniper-new

You whisper "Be honest to me
Do I drag you down by the heels?
You are a danger how you strain
Leaving me alone and in flames"

But you don't slow me down
You don't slow me down

Everything's nothing to me
This tremolo starlight, I see
Thoughts like cathedrals cold and dark
I just cling to you like I'm drunk

But you don't slow me down
You don't slow me down
