

# Electric Life

Duncan Laurence

There's no pain in paradise  
No heartbreak in heaven  
No Mondays or traffic lights  
How could it be real  
You're up near the satellites  
You left in a second  
Yeah that was the only time the earth stood still

Velvet skies when I close my eyes  
Free-falling into another space and time  
I miss you and your electric life  
Shine on bright  
Beautiful to the bitter end  
You blew away like glitter in the wind  
I miss you and your electric life  
Ah ah ah, your electric life  
Ah ah ah, your electric life  
Ah ah ah, your electric life  
Ah ah ah, your electric life

Take a look at the milky way  
At 11:11  
Are any of these shooting stars  
A message from you  
Is there any other way  
Got millions of questions  
But what always breaks my heart  
And so does the truth

Velvet skies when I close my eyes  
Free falling into another space and time  
I miss you and your electric life  
Shine on bright  
Beautiful to the bitter end  
You blew away like glitter in the wind  
I miss you and your electric life  
Ah ah ah, your electric life  
Ah ah ah, your electric life  
Ah ah ah, your electric life  
Ah ah ah, your electric life

Ah ah ah, your electric life  
Ah ah ah, your electric life
