

I heard about time when it's free  
It's barely even down with me  
But when it comes to carving time  
It's my specialty  
Oh you are so special to me

Standing still, I see the art you are  
When you slowed down, I witnessed a shooting star  
When it's me and you it's like everything's frozen  
Before you, it was feeling like the timeline was broken  
I only have minutes but you deserve days  
I be running but you made me wanna stay  
I had a couple questions and some demons that we had to face  
Now we're at the table having dinner and you made them a plate

I heard about time when it's free  
It's barely even down with me  
But when it comes to carving time  
It's my specialty  
Oh you are so special to me

Being who you are is something to witness  
Feeling feelings and they're not open ended  
I can finally breathe  
Thank you for being gentle with me

This what it feels like when things go right  
I'm lucky that you see me with no light  
I never had to explain  
You knew why, that's why I can't help but love you

This what it feels like when things go right

Baby  
I'm so shook for you baby  
Gon' be so amazing  
It's one for the pages
