

Big Boy

DURRY

It's a long way down
When you're living life six feet off the ground
But no matter how much I slouch
I know I'll never blend in with the crowd

It's a long way down
And every time I leave the house
It's always, "Hey! How's the weather up there?"
I swear I'm never gonna live this down

'Cause I've always been a big boy
Super sized baby
Clocking six-foot-five, certified husky
But I don't mind
Standing in the back of the show
'Cause I can see just fine

Until I saw you at the front of the room
We're talking five-foot-two in platform boots
And I know you could be the one I was destined to meet
You could be my fun-sized queen

Do you need yourself a big boy?
I don't mind reaching for the top shelf milk
'Cause I know you can barely see it
But I still cry
Every time I'm in the back of your car
The world is too damn small
Or maybe I'm just too tall
It's never really one size fits all
But maybe we're better off

Now you got me feeling
Large and in charge
Maybe like it's okay
Maybe I can pull this off
Large and in charge
Maybe like it's okay
To take a little space

'Cause I'm a big boy
Super sized baby
Clocking six-foot-five, certified husky
But I don't mind
Standing in the back of the show
'Cause I can see just fine

'Cause I'm a big boy
I don't mind reaching for the top shelf milk
'Cause I know you can barely see it
But I still cry every time I'm in the back of your car
The world is too damn small'
Or maybe I'm just too tall
It's never really one size fits all
But maybe we're better off
