

# Why We Call Each Other

Dustin Lynch

There you go lighting my phone up and I know what you're wanting  
Cause nobody likes a lonely at 2 in the morning  
It's always been like this, our friends don't even know  
It is what it is, keep it on the down low

Cause we love how the fire feels  
No strings, cause it isn't real  
And you love the way I love the way you kiss  
And we never wanna hold it on  
It's just the right shade of wrong  
But we know heavens at our fingertips

That's why we call each other  
In the middle of the middle of the night  
We're so good undercovers  
That's why we call each other

Everytime you say you need me it just feeds the habit  
And you'll be gone by sunrise forgetting it ever happened  
Girl you know I'm good, with just being your go to  
So we'll keep on, keep on doing what we do, yeah

Cause we love how the fire feels  
No strings, cause it isn't real  
And you love the way I love the way you kiss  
And we never wanna hold it on  
It's just the right shade of wrong  
But we know heavens at our fingertips

That's why we call each other  
In the middle of the middle of the night  
We're so good under covers  
That's why we call each other

Cause we love how the fire feels  
No strings, cause it isn't real  
And you love the way I love the way you kiss  
And we never wanna hold it on  
It's just the right shade of wrong  
But we know heavens at our fingertips

That's why we call each other  
In the middle of the middle of the night  
We're so good under covers  
That's why we call each other
