

Hewlett's Comet

Dustin Tebbutt

This is our love
This is our love

It's no secret
I see an atlas in your eyes
Do you see the same in mine?
Do you feel it?
We were falling through the night
In the morning more alive

This is our love
This is our love

You're a comet
That flickers through my mind
I feel you orbiting tonight
Could it be that
The charts and stars were right
Cause I know we're still alive

This is our love
This is our love
What is our love?
This is our love

As I see you standing there now
Still feels like the first time somehow
As I see you waiting there now
Still feels like the first time somehow

This is our love
This is our love
What is our love?
This is our love
This is our love
