

# Still in My Heart

Dustin Tebbutt

You said I need this  
Through the distance in your eyes  
Stay until the morning  
I don't want to dream alone tonight

I know you're feeling nervous  
But that's how you know it's right  
I'll stay until the morning  
You don't have to be alone tonight

The colours start to run  
The colours start to run

Now it's an open road  
And you can do what you want  
But when it's said and done  
You know you're still in my heart  
Still in my heart  
Now it's an open road  
And you're all that I want  
Don't you let me run  
Cause you're still in my heart  
Still in my heart

You can do your worst as  
Now I know that you spit fire  
But I love all your creases  
So leave the distance in your eyes

Don't keep me like your secrets  
Cause they won't ever see the light  
So pull me under your dress  
We won't have to be alone tonight  
No, we won't have to be alone tonight

Now it's an open road  
And you can do what you want  
But when it's said and done  
You know you're still in my heart  
Still in my heart  
Now it's an open road  
And you're all that I want  
Don't you let me run  
Cause you're still in my heart  
Still in my heart

The colours start to run  
The colours start to run

Now it's an open road  
And you can do what you want  
But when it's said and done  
Cause you're still in my heart  
Still in my heart  
You know I need this  
You know I need this  
Cause you're still in my heart

Still in my heart

You said I need this  
Through the distance in your eyes  
Stay until the morning  
I don't want to dream alone tonight
