

White Water

Dustin Tebbutt

Found a cluster
In your eyes and
It's percussion
It's percussion

Show me resin
I got grounding
And I'll be ready
With a hand on my heart

You're white water can you carry me now
Always running but you're never running out
You're white water can you carry me now

You're white water can you carry me now
Always breaking but no stone will slow you down
You're white water can you carry me now

I found the solder
I saw the sparking
Start drowning out
The older scars

It's giving more than
What it's taking
And I'll be ready
With a hand on my heart

You're white water can you carry me now
Always running but you're never running out
You're white water can you carry me now

You're white water can you carry me now
Always breaking but no stone will slow you down
You're white water can you carry me now
