

Somebody Like You

DVBBS

(Somebody, body like, body like you
Somebody, body like, body like you)

Crystaline feelings when our souls align
Hope we never end
Storylines, twisting, turning through the night
Blowing in the wind

Been up for days
In your embrace
On a new high
We chase moonlight
Up for days
In your embrace
If we say goodbye
I may never fly

Somebody, body like, body like you
Somebody, body like, body like you
Somebody, body like, body like you
Somebody, body like, body like you

Somebody, body like, body like you
I'll never find somebody like you
Body like, somebody, body like you
I'll never find somebody like you

Talk to me, senses taking over me
Basking in the beat
Purity, how you hold me underneath
Almost like a dream

Scenery change when you call my name
Down the fire escape
Misery fades when I find your face
[?] always

Somebody, body like, body like you
Somebody, body like, body like you
Somebody, body like, body like you
Somebody, body like, body like you

Somebody, body like, body like you
I'll never find somebody like you
Body like, somebody, body like you
I'll never find somebody like you

Been up for days
In your embrace
On a new high
We chase moonlight
Up for days
In your embrace
If we say goodbye
I may never fly

Body like, somebody, body like you

I'll never find somebody like you
Body like, somebody, body like you
I'll never find somebody like you
