

Just Us

Dylan Conrique

Sometimes we need a friend through the darker times
To be there to the end, to the end of time
You don't wanna hurt again (And again, and again, yeah)
We just need one another to make it through the day

True friends are hard to find, they come and they go all the time
Others will follow and they will all leave, but you can count on me, woo!

I can always find others, but nothing compares to us
We always stick together through the roots of us
I will never find others to bring me up when I'm down
There's nothing between us, there's no one else
It's just us
It's just us
It's just us

Friend knows all you're stories, but best friend knows all you're secrets
Can you keep it?
Fake friends they start a rumours (Fake friends, oh, rumours)
They can't out do us, you can not keep 'em, can't keep 'em

True friends are hard to find, they come and they go all the time
Others will follow and they will all leave, but you can count on me, woo!

I can always find others, but nothing compares to us
We always stick together through the roots of us
I will never find others to bring me up when I'm down
There's nothing between us, there's no one else
It's just us
It's just us
It's just us

[?] look at my friends, and think of my self, how lucky I am
And then I think about all the time we spent, what would I do without them?

I can always find others, but nothing compares to us (Others)
We always stick together through the roots of us (Woo!)
I will never find others to bring me up when I'm down (Down, yeah)
There's nothing between us, there's no one else
It's just us, mm, yeah
It's just us, yeah, yeah, yeah, yeah

It's just us, mm, yeah
It's just us, yeah, yeah, yeah
It's just us
