

## Spotlight

Dylan Gardner

We're in the spotlight  
Trying to learn how to dance  
Moving your hips right  
Wanna melt in your hands  
You got that head right every night  
We're gonna have a good time

It's the afterlife of a paradise  
Let me take you to a vibrant world with me tonight  
Swirl your fingers right through this twisted night  
And I know that in the morning we can still be high

Silver city lights sparking up the life  
Yeah, I'm running down a dream with you on me tonight  
Just one sip of you and I'm faded too  
Cuz I know that no one else can do it like you do

We're in the spotlight  
Trying to learn how to dance  
Moving your hips right  
Wanna melt in your hands  
You got that head right every night  
We're gonna have a good time

Got me sinking down  
Underneath the ground  
You can do just want you want  
Don't make it watered down  
Let me move with you  
I can show you too, baby

We're in the spotlight  
Trying to learn how to dance  
Moving your hips right  
Wanna melt in your hands  
You got that head right every night  
We're gonna have a good time
