

With a Kiss

Dylan Gardner

I wake up each day and think where we'll be when it begins
It's already in my head
Just a simple melody to say words I can't actually
To say what I haven't said

And there goes the world, she's the only girl
We can't slip away tonight
And while we're all here, going to face our fears tonight

Singing I can't say much more with words like this
Love's just a life we all start with a kiss
Love's just a life we all start with a kiss
Love's just a life we call something like this

It goes round and round again 'till it never ever ends
All the ways you tried to say
That the simple melody has been playing endlessly
And it's all stuck in your head

And there goes the world, she's the only girl
We can't slip away tonight
And while we're all here, going to face our fears tonight

Singing I can't say much more with words like this
Love's just a life we all start with a kiss
Love's just a life we all start with a kiss
Love's just a life we call something like this

I can't say much more with words like this
Love's just a life we all start with a kiss
Love's just a life we all start with a kiss
Love starts a life we call something like this
Love's just a life we all start with a kiss
Love's just a life we all start with a kiss
