

# Chernobyl 2.0

Dymytry

Black is the future  
A golden past behind us  
We are believers  
Baptized in deadly dust  
What we've created  
A radiated darkness  
That lights our way out  
Into extinction

Death is calling so listen up  
Can't you hear their cries begging us to stop  
Voices stuck like needles in my head  
Justice is near there is no way out  
A toxic plague coming from the clouds  
Hidden under concrete  
The world bleeds  
Don't bite the hand that feeds

A test for freedom  
A test for hope and sorrow  
No time for violence  
Let's build a new tomorrow  
This is a warning  
Cause life is short and precious  
A brand new morning  
For us to live our wishes

Death is calling so listen up  
Can't you hear their cries begging us to stop  
Voices stuck like needles in my head  
Justice is near there is no way out  
A toxic plague coming from the clouds  
Hidden under concrete  
The world bleeds  
Don't bite the hand that feeds  
Don't bite the hand that feeds

Death is calling so listen up  
Can't you hear their cries begging us to stop  
Voices stuck like needles in my head

Death is calling so listen up  
Can't you hear their cries begging us to stop  
Voices stuck like needles in my head (This world it bleeds)

Justice is near there is no way out  
A toxic plague coming from the clouds  
Hidden under concrete  
The world bleeds  
Don't bite the hand that feeds  
Don't bite the hand that feeds (This world it bleeds)  
Don't bite the hand that feeds
