

## Apex

Dynazty

Have you seen angels on your screen  
A perfect snapshot of harmony  
Do you believe in fantasies  
Then step inside this narcissistic dream

I see liars, bent desires in a viral charade  
Let your life be run by egos untamed  
I see modern ages fall in stages as we climb to the sun  
The decline of our race has begun

Hail liberty we are free  
We dance with madness and we reign supreme  
All hail liberty  
We dance with madness and we reign supreme

Come exercise your liberty  
With unqualified use of free will  
Lose the grip on factuality  
And become the apex of society

The dejection is our connection, our viral disease  
Show the world how perfect life can be  
While you fall asunder as you suffer on the way to the sun  
The decline of our race has begun

Hail liberty we are free  
We dance with madness and we reign supreme  
All hail liberty  
We dance with madness and we reign supreme

Hail liberty we are free  
We dance with madness and we reign supreme  
All hail liberty  
We dance with madness and we reign supreme  
Hail liberty we are free  
We dance with madness and we reign supreme  
All hail liberty  
We dance with madness and we reign supreme
