

Breathe with Me

Dynazty

Every second, every breath
With every step you'll ever take
When the curtain falls you're wide awake
It's not about what's right or fair
It is a stage for those who dare
Now the hurricane lies in the air
Come and let the storm bring us to life
'Cause if you would let me chase the moon
Then I would bring down the clouds
There's an open road that leads us to the sun
And when the odyssey has ended we have won

It's the time, this is the place
Let all of your fears lay still to rest
This is the choice, this is our one strong voice
Don't hold your breath
Don't close your eyes
Take the fall and let us burn a while
This is the choice, this is our one strong voice
And the world is what you see
Just breathe with me

We have a say, we have a choice
There is a strength within our voice
Desolation burns yet we go on
I will never, ever let you down
I will be the calm within your storm
I'll be the rage in your still
Every second hurts but still we carry on
And when the battle's finally ended we have won

It's the time, this is the place
Let all of your fears lay still to rest
This is the choice, this is our one strong voice
Don't hold your breath
Don't close your eyes
Take the fall and let us burn a while
This is the choice, this is our one strong voice
And the world is what you see
Just breathe with me
