

Call of the Night

Dynazty

Say, do you like the way it moves
The circle motions of the gloom
Truth escapes the light when neon shadows dance under the moon
Now raw emotion is in power
The hand and of god will strike the hour
Light is blinding but through shadows of the dark my eyes see true

One step out of the light
We begin to surrender to the call of the night
Two steps taken for life
And forever give yourself to the call
To the call of the night

I have seen the depths of the dark well
I know the stories it can tell
The allure of danger, strangers and the promises they sell
The burden of human desire
Shines through darkness like a fire
When the smoke is gone the devastation's clear as daylight view

One step out of the light
We begin to surrender to the call of the night
Two steps taken for life
And forever give yourself to the call
To the call of the night

(One step out of the light
We begin to surrender to the call of the night
Two steps taken for life
And forever give yourself to the call
To the call of the night)

One step out of the light
We begin to surrender to the call of the night
Two steps taken for life
And forever give yourself to the call
To the call of the night

One step out of the light
We begin to surrender to the call of the night
Two steps taken for life
And forever give yourself to the call
To the call of the...

Night...
