

Firesign

Dynazty

The facade falls dead to the floor
Let it all burn down
I'll be silent no more
Time to rectify
Can't you see that I'm real
I have always been
The shadow that you feel you personify

You try to shake me
You'll never break me
'Cause I can hurt you
Yes I can hurt you

I rise inter connected
We will never go undetected
Like artillery light me up I will burn the sun down
I see strength resurrected
Solid shape ever undefected
In a synergy light me up like a firesign
Shadows fading, see the colors will light up the sky
A firesign

Brace to fall face down to the floor
Go on antagonize me
I stand here silent no more
Apprised for all to see
This parody is evident
I see right into you
For retribution I'm hell bent
There's naught for you to do

You try to chain me
You'll never catch me
I stand above you
Yes, I'm above you

I rise inter connected
We will never go undetected
Like artillery light me up I will burn the sun down
I see strength resurrected
Solid shape ever undefected
In a synergy light me up like a firesign
Shadows fading, see the colors will light up the sky
A firesign
