

I'm so, I'm so sick  
Of shutting down when you come to me  
I'm cut so clear  
I know, I know that  
You offer nothing  
When I run to you, you walk on me

I used to think we had purpose  
Like a house without a roof  
Or a car without wheels  
I think I'm soaking in problems  
You're dripping through  
The paths you split

Nobody hurts me  
Fuck you for trying  
You got me all wrong  
What were you thinking?  
Doing the same thing, you promise you're changing  
You got this all wrong  
What were you thinking?

You know, you know that  
I'm just as broken as I've always been  
You exploit me

Can you take care of your weakness?  
It's showing through  
I'm not that thick  
I used to think you had substance  
But you have no truth  
You're insincere

Nobody hurts me  
Fuck you for trying  
You got me all wrong  
What were you thinking?  
Doing the same thing, you promise you're changing  
You got this all wrong  
What were you thinking?

Look where we end up  
No way out  
I am stuck  
Have you got me where you want?  
No way out  
I am stuck

Nobody hurts me  
Yeah, fuck you for trying  
You got this all wrong  
What were you thinking?  
Doing the same thing, you promise you're changing  
You got me this wrong  
What were you thinking?
