

# Alone

Eagle Eye Cherry

Faded dreams have no chance to be  
Last goodbye, dust to dust  
You're on your knees praying silently  
Shedding tears for all of us

Loss of words, all along the way  
Loss of words, nothing left to say

You don't have to worry  
You will never be alone for another day  
You don't have to worry  
You will never be alone for another day

Never be alone for another day

Mind the friends all the strangers see  
No more them, no more us  
Silence breaks filled with misery  
Thousand elves turned to rest

Loss of words, all along the way  
Loss of words, nothing left to say

You don't have to worry  
You will never be alone for another day  
You don't have to worry  
You will never be alone for another day

Never be alone for another day  
Never be alone for another day

Loss of words, all along the way  
Loss of words, nothing left to say

You don't have to worry  
You will never be alone for another day  
You don't have to worry  
You will never be alone for another day

Never be alone for another day  
Never be alone for another day
