

# Become A Light

Eagle Eye Cherry

Who the fuck cares  
What tie I wear  
If you were here I know what you'd say  
"Comb through your hair  
Walk tall and straight  
Go and make me proud of you today."  
Hey

And all the seeds you've scattered  
Mama they all came to see you

Become a light  
The world won't move it's watching you  
Become a light  
In the breeze you say goodbye  
Like streak of fire  
In the evening sky  
And you make no sound  
As you leave us behind  
Become a light  
And everything is different now  
And everything is different now

Funny what stays  
When part of us breaks  
That I took for granted before  
Like French cigarettes  
Words that you said  
Things I won't hear anymore

But all the ones who mattered  
All the hearts you've changed  
Came to see you

Become a light  
The world won't move it's watching you  
Become a light  
In the breeze you say goodbye  
Like streak of fire  
In the evening sky  
And you make no sound  
As you leave us behind  
Become a light  
And everything is different now  
And everything is different now

In the gloaming time  
Just before the night falls  
You become a light  
The world won't move it's watching you  
Become a light  
In the breeze you say goodbye  
Like streak of fire  
In the evening sky  
And you make no sound  
As you leave us behind  
Become a light

And everything is different now  
And everything is different
