

Catch Me

Eagle Eye Cherry

I know you tried to catch me
I know you tried to save me from myself
I think you tried to tell me
That I could really use somebody's help
And now you won't return my call
I've gone too high about to fall
I know you tried to catch me
And save me from myself
Save me from myself

I know I left and promised to be back in time
I get distracted, I can't keep myself in line
If there's a wrong well that's what I will do
I'm sorry ain't good enough for you

I know you tried to catch me
I know you tried to save me from myself
I think you tried to tell me
That I could really use somebody's help
And now you won't return my call
I've gone too high about to fall
I know you tried to catch me
And save me from myself
Save me from myself

There was a wish and then there was the time we met
And now I can't remember days without regret
And now you're gone with all I put you through
I'm sorry ain't good enough for you
Not good enough for you

I know you tried to catch me
I know you tried to save me from myself
I think you tried to tell me
That I could really use somebody's help
And now you won't return my call
I've gone too high about to fall
I know you tried to catch me
And save me from myself

If only I could turn back time and make amends
I can't deny I came too late and missed the end
What could've been
There's no again
I'm falling

You don't want to catch me
You don't want to save me from myself
I know you tried to tell me
That I could really use somebody's help
And now you won't return my call
I've gone too high about to fall
Now you don't wanna to catch me
And save me from myself

I know you tried to catch me
I know you tried to save me from myself

I think you tried to tell me
That I could really use somebody's help
And now you won't return my call
I've gone too high about to fall
I know you tried to catch me
And save me from myself
Save me from myself
Save me from myself
