

# Shine a Light

Eagle Eye Cherry

They say we live in a bad world  
Of people cold and mean  
Coming out of the woodwork  
To plot an evil scheme  
But if you look a little closer  
Nothing's really what it seems  
I know you're looking for answers  
You wanna know what it means

Shine a light on the system  
And let the whole world see  
Shine a light on your brothers  
Shine your light on me

I know it's hard from a distance  
A million miles away  
But all the good things we're missing  
Are coming back one day  
It's like you live in a bad bad dream  
And still you're wide awake  
I don't know all of the answers, but  
We're gonna be ok

Shine a light on the system  
And let the whole world see  
Shine a light on your brothers  
Shine your light on me  
Shine a light on each other  
That's how we make it through  
Tell your mother you love her  
Shine a light on you

Let's do it now... come on

It's like you live in a bad bad dream  
And you don't what to do  
Shine a light, shine a light, shine a light  
Shine a light on you

Shine a light on the system  
And let the whole world see  
Shine a light on your brothers  
Shine your light on me  
Shine a light on each other  
That's how we make it through  
Tell your mother you love her  
She'll shine a light on you

Shine a light on you  
Shine a light on you  
Shine a light on you  
Shine a light on you
