Earth, Wind & Fire

I get caught up in this insanity
Children buying in the streets
Did you have enough?
Did you have enough?
We've conquered all our eyes can see
But we still live in poverty
Did you have enough?
Did you have enough?
We had decided in our minds
To settle the future of mankind
We've signed on and committed to our love.

Every time you see me look around
I can see the people crying out
Cause the fear ain't an hour
Make good on my deep doubt.

How do you deny and make it right
Within us?
I won't go, I won't leave you be
For your way
For the fight, do what's right
Our way of life
We know that's your way, start today.

When I've said a lame worth of an excuse
For I feel on my abuse
Did you have enough?
Did you have enough?

We don't care what number you leave
When the truth in there, deep
Did you have enough?
Did you have enough?
We had decided in your minds
To settle the future of mankind
We've signed on and committed to our love.

We suffer every minute, every hour
Make the people wanna holler
Lead us, never follow
So this can't be our mother

How do you deny and make it right
Within us?
I won't go, I won't leave you be
For your way
For a better way, start today.

For your way
You walk free
For a better world
For a better way
For a fight, our way of life
For a better way, start today
Know I walk, know I agree if you agree
For a better way

For the fight, make what's right, our way of life
For a better way, start today.
