

## Spend The Night

Earth, Wind & Fire

You're like no one else that I have loved before  
There's a certain something in my heart  
For the first time in my life I know for sure  
You're the love that I've been looking for

A few unsettled differences is where we stand  
With a little effort we can them out  
I just want to hold you in my arms again  
Find it in your heart to let me in

I want to spend the night with you  
Make love like we used to do  
Oh, I want to feel a fire within  
I want to fall in love again  
After we get through  
I want to spend the night with you

There's a full moon shining in the sky above  
Let's don't waste this night on sad goodbyes  
After all it's you that I've been dreaming of  
Let's give into making up

[Chorus]
