

(Yeah)

Let's go back to basics  
Tilt your head towards the sky  
See the spaceships  
Long before we were stressing over payslips  
Mum's were getting facelifts  
We were in and out of phases  
Through our childhood, shame to waste it  
We used to live adjacent  
Party in the basement  
Used to chill with me and Frank  
But now you live with Jason  
What's he saying?  
Just send him my regards  
I really hope you're not too far

As long as I've got marshmallow clouds above me  
No-one in this world ever understood me  
We need the universe to be as it should be  
As long as I've got marshmallow clouds above me  
No-one in this world ever understood me  
You don't have to feel it now, just trust me

Yeah we're good  
Yeah we're good  
Yeah we're good  
Yeah we're good  
Yeah we're good

Yeah we could  
Yeah we could  
Yeah we could  
Yeah we could  
Yeah we could

So many arguments over nothing  
I've stopped counting  
We made movements so massive  
We moved mountains  
She was disco, she was bebop  
She was soul  
She was new-wave  
Make a young man feel old  
My etiquette and my big dreams  
And my attitude, problem  
My loose ends and my mistakes  
I thought she could solve them  
I was spaced out and I was face down  
[?] control  
She was red hot  
Made my pale skin feel cold

Say you feel a little blue sometimes  
Finding it hard to get up  
For a job that you hate  
Got your boss on your case  
Can't relate

Swear they've not got a clue sometimes  
Giving the best parts away  
Losing strength by the day  
Just hold up, I'm a junction away

As long as I've got marshmallow clouds above me  
No-one in this world ever understood me  
We need the universe to be as it should be  
As long as I've got marshmallow clouds above me  
No-one in this world ever understood me  
You don't have to feel it now, just trust me

Yeah we're good  
Yeah we're good  
Yeah we're good  
Yeah we're good  
Yeah we're good

Yeah we could  
Yeah we could  
Yeah we could  
Yeah we could  
Yeah we could
