

Sangria and bottle tops  
Popping like we'll never stop  
Reaching for some H2O  
Let's wash away these boulder rocks  
Drop a penny in the ocean  
Start a chain reaction  
Euphoric but unbalanced  
Like two top heavy fractions  
Cannon fodder, tunnel vision  
Cocoa butter television  
Silky smooth paranoia influencing my decisions  
Jostling for position  
We're so shit at making plans  
I miss your naked body and I miss your clammy hands  
I'll always show you up when I'm with you  
Trouble holding my liquor  
Passing out in your kitchen (it's bad)  
It's always 5 AM when you call me  
Different day, same story  
Hang it up and ignore me

I fucking hate it when you leave  
'Cause you've got something that I need  
And I'm not zen enough to do this each week  
Girl, I fucking hate it when you leave  
'Cause you've got something that I need  
And I keep dosing myself up on repeat, yeah

Yeah, our satisfaction is not by accident  
Photographing our lifestyle  
Our attraction is almost passable  
I'll write your name on my profile  
Happiness induced chemically  
But you tend to me until I pass out  
Here's the link to my Soundcloud  
Here's the keys to my hometown  
Mi casa es tu casa  
Turn it up on the master  
Brace myself for disaster (it's bad)  
You're always talkin' 'bout some home truths  
Catching me in some foul moods  
Eating all of my soul food

I fucking hate it when you leave  
'Cause you've got something that I need  
And I'm not zen enough to do this each week  
Boy, I fucking hate it when you leave  
'Cause you've got something that I need  
And I keep dosing myself up on repeat

Remember when you brought me marigolds and wine  
I put your shirt on then we kissed to pass the time  
I miss the places you would take me when we got too high  
But won't you stay at mine just for a little while?

I fucking hate it when you leave  
'Cause you've got something that I need

And I'm not zen enough to do this each week  
Girl, I fucking hate it when you leave  
'Cause you've got something that I need  
And I keep dosing myself up on repeat
