

All I Want

Eclipse

Feel buried six feet under ground
I say I'm fine but breaking up inside
Just another big lie
I'm caught up in this mess still
All I want is you
I do

The late-night drives and city lights
I don't want to sleep, don't want to be awake
It's just another mistake
In a battlefield of love still
All I want is you

But every time I'm leaving my heart's screaming
All I want and all I need is you
And every time we're meeting
My heart's bleeding
All I want and all I need
All I want and all I need is you

In the pages of our history
We sure have a love for misery
I know, I really got to let go
Through the echoes of redemption
All I want is you

Every time I'm leaving my heart's screaming
All I want and all I need is you
And every time we're meeting
My heart's bleeding
All I want and all I need
All I want and all I need is you

Give me just one more chance
I'll give you one more dance
There is no yesterday, tomorrow
Give me another day
Promise don't walk away
I'll follow happiness and sorrow

Cause every time I'm leaving my heart's screaming
(All I want and all I need is you)
And every time we're meeting
My heart's beating
All I want and all I need
All I want and all I need is you

Oh, can I ever walk away

Cause all I want and all I need
All I want and all I need is you
