

# Dive Into You

Eclipse

You know some say it is better  
To burn out than fading away  
Guess no one wants to live forever  
Just maybe one more day

I know that every time that life knocks you out  
Better have that heartbeat next to yours  
And hoping, hoping things get better  
They say you better get better soon

Because you don't know what you've got  
Until you realize it's over  
No, you don't know what you've got  
Until the end is getting closer, oh no  
I wanna be lost  
I wanna dive  
Into you

It's just a moment and then it's gone  
We are but dust in the wind  
Even the brightest stars won't shine forever  
And the same goes for you and me

You know life is only a shred of light  
Between eternities of night  
Don't wait, don't wait until it's better  
It's now or never, it's you and me  
Oh, right here (right now)

Because you don't know what you've got  
Until you realize it's over  
No you don't know what you've got  
Until the end is getting closer, oh no  
I wanna be lost  
I wanna dive  
Into You

Because you don't know what you've got  
Until you realize it's over, no  
Now is all we've got  
Let's make it count  
Before the walls come tumbling down  
I need you close to me  
I wanna be lost  
I wanna fall  
Right into you  
I wanna sink  
I wanna dive  
  
Into you
