

Divide & Conquer

Eclipse

Back in the future
The same old song and dance
The one percent controlling ninety-nine, how
We're falling, we're crawling on our hands and knees
The television spreading the disease, yeah

Another time, another place, another field
Another world, another you, another me

It's divide and conquer
It's divide and conquer
We're going off the rails
No, this ain't no fairy tale
It's divide and conquer

They lead, we follow
Good minions obey
And we don't care how many we must slay, no
The left wing, the right wing screaming for war
The politicians laughing at the gore

Another kid, another town, another field
Another gun, another you another me

It's divide and conquer
It's divide and conquer
Going off the rails
No, this ain't no fairy tale
It's divide and conquer

Oh, yeah...

It's divide and conquer
It's divide and conquer
They show no mercy when they hit you
Show no mercy when you fall
Divide and conquer
Going off the rails
No, this ain't no fairy tale
It's divide and conquer
