

So Long, Farewell, Goodbye

Eclipse

If I'm not forgotten
Just remember my heart
When you're lost in the dark
If I'm not forgiven
Then we're so far apart
At the end not the start

You think you know me
Controlling me with fear
Consumed by your greed
This never ending wheel
Will never stop

What's the worst thing that could happen
So long, farewell, goodbye
What's the worst thing that could happen
So long, farewell, goodbye

If I'm not the answer
To the need and the greed
To the ego you feed
If I'm not the cancer
That you're pinning on me
Want the world to believe

You think you know me
But I am not afraid
You're lying through your teeth
This never ending wheel
Will never stop

What's the worst thing that could happen
So long, farewell, goodbye
What's the worst thing that could happen
So long, farewell, goodbye

If these are the choices you're making
Then this is the way we both go down

What's the worst thing that could happen
So long, farewell, goodbye
What's the worst thing that could happen
So long, farewell, goodbye
So long, farewell, goodbye
So long, farewell, goodbye
