

# The Masquerade

Eclipse

Believers, deceivers  
Turned into bitter cheaters  
In fever  
We are the stars of the masquerade

Between the good and evil  
Between the day and night  
We are caught in between what's wrong and right  
We're blinded by the power  
Blinded by the light  
It's a long winding road out of the night

Once like thunder in the distance  
The world is soon on fire  
The beast inside is ready for another lie  
So

Believers, deceivers  
Turned into bitter cheaters  
In fever  
We are the stars of the masquerade  
Believers, deceivers  
Turned into bitter cheaters  
In fever  
We are the stars of the masquerade

We are, we are the stars of the masquerade!

Beyond the highest mountains  
Beyond the desert plains  
Far beyond where no love will remain  
I tried to fight the fire  
I tried to fight the pain  
But the struggle has always been in vain

Now the thunder is upon us  
The world is set on fire  
The beast is getting ready for the final fight  
So

Believers, deceivers  
Turned into bitter cheaters  
In fever  
We are the stars of the masquerade  
Believers, deceivers  
Turned into bitter cheaters  
In fever  
We are the stars of the masquerade

We are, we are the stars of the masquerade!  
...
