

# The Spark

Eclipse

Just one spark can light up a fire

It's turning into a game  
Like Call Of Duty, now reality's insane  
Another form of cocaine  
To numb the feelings, numb the heart and numb the brain

I don't wanna play  
Gonna break away  
I'm looking for some peace of mind  
Cause my heart's open wide  
Killing me inside

Oh, can anybody feel me now  
Just one spark can light a fire  
I'll never surrender, I'll never give up  
Just one spark can light a fire  
Just one spark can light up a fire

I've got a plan to escape  
Out of the cage cause I ain't giving in to hate  
I'll leave it all in the wake  
I've had enough  
Be the master or the slave

I don't wanna play  
Gonna break away

Oh, can anybody feel me now  
Just one spark can light a fire  
I'll never surrender, I'll never give up  
Just one spark can light a fire

Can anybody feel me now  
Just one spark can light a fire  
I'll never surrender, I'll never give up  
Just one spark can light a fire  
Just one spark can light a fire  
Just one spark can light a fire  
Cause just one spark can light up a fire

Just one spark can light up a fire
