The Storm

Eclipse

This is an emergency
This is an emergency
Just like a breaking wave
A moment of life and then its gone
Back to the dust of stars, we're always gonna be
There's a moment to live when the flame disappears
There's a moment to die and we're left in despair
Just take my heart, away
This is an emergency
Screaming for help I feel I'm falling
This is an emergency
Somewhere in the distance see you calling
And from ashes to ashes dust to dust
No exit no escape out of the storm
The night is a lonely place
And if we should falter on our way
And taking the final leap into the great unknown

There's a reason to fight when our chances are thin
There's a reason to lose when we just cannot win
So take my heart, away
This is an emergency
Screaming for help I feel I'm falling
This is an emergency
Somewhere in the distance see you calling
And from ashes to ashes dust to dust
No exit no escape out of the storm
Cause this is an emergency
Screaming for help I feel I'm falling
Cause this is an emergency
Somewhere in the distance see you calling
Cause from ashes to ashes dust to dust
No exit no escape out of the storm
