

# Sycamore

Ed Sheeran

Sycamore in the summer bearing leaves  
Swing, you're pushing our daughter underneath  
Flowers bloom in the garden, sway in breeze  
Just imagine a world where we could be

Right now in the waiting room, emotions running wild  
Worried 'bout my lover and I'm worried 'bout our child  
And part of me was always in denial  
It's gonna take a little while

We're in our story, love in, love out  
And we are glorious  
We're in our story, love in, love out  
And we are glorious

Sycamore bringing shade from beating sun  
Nothing more than a word, a smoking gun  
What a puzzle is this to be in love  
To be planting your roots then dig them up

Waiting on professionals to tell you how it is  
What's he gonna say after 'I think you better sit'?  
Brace yourself, something's about to hit  
It's gonna take a little while

We're in our story, love in, love out  
And we are glorious  
We're in our story, love in, love out  
And we are glorious

We're in our story, love in, love out  
And we are glorious  
We're in our story, love in, love out  
And we are glorious

Sycamore in the field, a lonely tree  
Darling, what will become of you and me?
