

## My Shining Star

Eddi Reader

When the storm is raging and the sky is black  
Your light came to me in the bar  
And it brought me to my journey's end  
You are my shining star

Can I stay with you my shining star  
Everything that I am seems to be where you are  
Now the sun has eclipsed, cos here you are  
You are my shining star

Can I stay with you my shining star  
Everything that I am seems to be where you are  
Now the sun has eclipsed, cos here you are  
You are my shining star

Can I stay with you my shining star  
Everything that I am seems to be where you are  
Now the sun has eclipsed, cos here you are  
You are my shining  
You are my shining  
You are my shining star
