

Amnesia

Eddie Benjamin

Stone cold
Fingertips she's bleeding on the white snow
Couldn't even tell ya how the scars grow
But they have been painted for a while
I can't
Speak for you my darling but I can hold your hand
See it my eyes, I can't understand
Stupid things for cash without a gun

Funny how I never will forget
I made it all pretend
Break it down and build it up again
I made it all pretend

Show me
Now that I have seen you fall, it still haunts me
Spectrum of emotion, you never see me
Burning at the air like you might drown
Expensive
Guess there's only one more time and I've spent it all
Come on let him fall, I can't have it all
Without the price of someone with a gun

Funny how I never will forget
I made it all pretend (I made it all, I made it all pretend)
Break it down and build it up again
I made it all pretend

Mind's been stolen, memories floating
What else do you call it?
Far from knowing where I'm going
What else do you call it?

Stars gone
Fingertips, I'm bleeding on the white snow
Start me now and I will never remember
Remember
