

Someday We'll Have A Better World

Eddie Kendricks

Someday we'll have a better world
Where people walk hand and hand
Someday we'll have a better world
Where people talk man to man
A time of peace will be in sight
There will be no wars left to fight
We won't have to destroy each other
We will have more love for one another
Someday we'll have a better world
Where men can lay down their guns
And every boy and every girl together can laugh and have fun
There will be no concern to race
No need worry about the color of a face
There will be no need for discrimination

There will peace all across the nation
Is it just a dream that never will come true?
The possibilities are left up to me and you
We must do all we can to understand a better man
And make a better world for me and you
A world of harmony and love
The kind of world we've been dreaming of
If we all make up our minds
A better world we will find
[Outro repeated until song fades out]
Someday we'll have my friends a better world to live in
