After Losing You

Eddy Arnold

```
All the places we used to go
All the things we used to do
All the things are in the past
After losing you.

Now my life's just one big heartache
And my world is turning blue
I've gotta hurt I can't get over
After losing you.

I go to the places we used to go
Just hoping to get a glimpse of you
And everytime I see you with your new love
It hurts me and breaks my heart in two.

I thought no one could come between us
For you said you love me true
You've put me down, I went to pieces
After losing you.

You've put me down, I went to pieces
After losing you...
```
