

## Just Across the Mountain

Eddy Arnold

Just across the mountain there is something calling me  
Calling come and see way you ought to be  
A valley full of buttercups is singing me a song  
Come and see the place where you belong

It's near a town they say by the name of Want To Stay  
Right near a little village called Someday  
It's just across the mountain where the big airliners fly  
And I am gonna find it by and by

(It's near a town they say by the name of Yesterday)  
Right near a little village called Someday  
It's just across the mountain where the big airliners fly  
And I am gonna find it by and by

And I am gonna find it just across the mountain...
