

Nocturne

EDEN

If you fall, I'll catch you

So I've been thinking 'bout something
Lately I've been alive
Cause I found my reason in nothing
So I won't close my eyes
Cause I don't want to miss one second
And I don't want to feel so cold
And I don't want to be so sad that we are who we are
Cause we had no control

But only by the night
Will we ever make headlines
Will we ever make things right
When we've only ourselves to blame
When we've only ourselves to blame

So I won't sleep
No more
No I won't sleep
No more
I won't sleep
I always thought that there'd be more than just wishing
No more
My life away
No DMT will stop me
Like I could always
Figure it out and never have to abandon what's in-front of me
Dream

No more

So get this doubt out of my head
It's only real if you let it
And I've been letting go of my ghosts
I'll never let them catch me no more
But these words are all I have
So I'll just keep dreaming out loud
And if I just keep talking
Maybe I'll figure all this out

But only by the night
Will we ever make headlines
Will we ever make things right
When we've only ourselves to blame
When we've only ourselves to blame

So I won't sleep
No more
No I won't sleep
No more
No I won't sleep
I always thought that there'd be more than just wishing
No more
My life away
No DMT will stop me
Like I could always

Figure it out and never have to abandon what's in-front of me
Dream

No more
