

## nowhere else

EDEN

You've been confusing since the day I met you  
Another night chasing, this feels like home  
Since I've been miles away no change  
Outside or inside looking dazed  
Just wash the glitter off your face and go home

And this enthralling shadow's gone, ghost town  
It's strange to think that we were strangers once  
It's square one  
I guess it's something where I want more than I've got  
But I can't ask you for the things you don't feel  
Don't

Cause I don't want no fake love, fake love, fake love  
I don't wanna know no fake friends, forced smiles for favours  
And I don't wanna know no fake love, fake love, fake love  
Just say what you wanna say

And I'll still be there  
It's easy when you've nothing to lose  
And I'll still be there  
Cause I've got no hope  
Yeah

She told me love me fast or take it slow  
I said I'm going nowhere fast as hell  
And keeping with the times we gotta keep it on the low  
Midnight habits burning through the summer since the snow and  
I finally feel myself again  
It's been so long, I thought I'd see the end  
I guess you need ends to begin again  
And again, and again

Cause this is nothing we ain't seen before  
I lived through it I ain't overdosed  
The sky is falling like it always does  
So I'll guess we'll see if someone's watching over us  
So let it rain  
The clouds look heavy, but they bare no weight  
The scars can't hurt you, and the bruises will fade

And I don't want no fake love, fake love, fake love  
I don't wanna know no fake friends, forced smiles for favours  
And I don't wanna know no fake love, fake love, fake love  
Just say what you wanna say

And I'll still be there  
It's easy when you've nothing to lose  
And I'll still be there  
Cause I've got no hope

Cause I don't want no fake love, fake love, fake love  
I don't wanna know no fake friends, forced smiles for favours  
And I don't wanna know no fake love, fake love, fake love  
Just say what you wanna say  
Yeah
