

Welcome home, welcome life  
So unknown, when you arrive  
The fire, so cut the wire  
Your eyes, your small eyes  
Your eyes, your hopeful eyes  
Welcome life, welcome home  
Welcome to a world that's so unknown  
Dust and dreams, fall or shine  
Welcome to the world  
The grand design

And here you are, and here you stay  
Into the light to your entree  
Innocent child, so pure to the core  
It is a long way to explore

Go on, never believe it's done  
It is a journey unknown  
It is life that only has begun

Terra nova, nova era rise - blazing a trail  
Terra nova, nova era rise - one in a mankind's dream  
Terra nova, nova era rise - rising to fame  
Terra nova, nova era rise  
Why not blazing a trail and change  
A new world is waiting a new world is here

The spirits of youth, when you're in your prime  
Nothing can tire out, you never mark time  
The shifting of scenes, the cushy life's gone  
Reversing the roles, the game is on

Go on, never believe it's done  
It is a journey unknown  
It is life that only has begun

Terra nova, nova era rise - blazing a trail  
Terra nova, nova era rise - one in a mankind's dream  
Terra nova, nova era rise - rising to fame  
Terra nova, nova era rise  
Why not blazing a trail and change  
A new world is waiting a new world is here

Cosmogony, a world to rise

Cosmogony, a world to rise  
It's the legacy of the wise  
Just one providence marks the line  
Cosmogony, a world divine

One, one small hope  
Is lucently lurking in all  
A leap in the dark  
The final incarnation's call  
The hard lot of earth  
Will have turned to rebirth  
When a love of a man

Takes on the venture, you can

Welcome home, welcome life  
So unknown, when you arrive  
...
