

# Sundown

Edgar Winter

Sundown

See the magical feelings of the day at sundown  
Chase all my worries away at sundown

Sundown

In the sky light sings a serenade  
And the highlighting, watch the colors fade  
Just after they're made

Sundown

See the day give way to the night at sundown  
Placing a shade on the light at sundown

Sundown

Calling out to the people below, oh  
Calling out, get ready to go

Rushing into the night

Where the world has a silver lining  
While the stars are out there shining  
They call to my friend  
Come on do it again

Come on do it again

Do it again

Come on do it again

Do it again

Come on do it again

Do it again

Sundown

See the magical feelings of the day at sundown  
Chase all my worries away at sundown

(Sundown)
