

You are like a planet
Can I be your universe?

Let our worlds collide
In the desert night
In my dimension

Stop the time
Stop the time
Stop the time

Take me to forever
Take me to forever

Across the time
Across the space
I'll melt your world
With my embrace
Take me to forever

Come in my dimension
There we'll never waste away
We'll be young
Young
In my constellation

Stop the time
Stop the time
Stop the time

Take me to forever
Take me to forever

Across the time
Across the space
I'll melt your world
With my embrace

Take me to forever
Take me to forever
Across the time
Across the space
I'll melt your world
With my embrace
Take me to forever
