## **Fingers in the Factories**

## **Editors**

Easy said and easy done Is how we like this Keep us in our place

Youre the night
The dirty night
That keeps us going
Nothing left to waste

Pull a sentance from your lips to keep them quiet what they want to hear

You're the night
The dirty night
That keeps us going
no one left to fear

As the sun goes down
On a broken down
And the fingers bleed
In the factories
Come on out tonight
Come and see the sight
Of the ones you love
And the ones in love
When you
Keep with me
Keep with me
Keep with me
Keep with me

Smile for once for a moment It makes us happy What we need is here

You're the night
The dirty night
You make us angry
theres everything to fear

As the sun goes down
On a broken down
And the fingers bleed
In the factories
Come on out tonight
Come and see the sight
Of the ones you love
And the ones in love
When you
Keep with me
Keep with me
Keep with me
Keep with me

As the sun goes down On a broken down

And the fingers bleed
In the factories
Come on out tonight
Come and see the sight
Of the ones you love
And the ones in love
When you
Keep with me

Keep with me
