

In Another Life

Edward Maya

Why do the perfect things
End up right out of reach
'Cause that's how it happened to me
I know

You're probably in the arms
Of someone who's got your heart
The person that I wish I could be

You're like a
Melody
I can't get out of my head
It's a remedy
Something I wanna give all of my time
Your green candy eyes
Get locked onto mine
In another life

You take it in
From up on top of the world
Tell me anything
No one and nothing could change how I feel
Used to fall from the sky
And feel so alive
In another life

I know I missed my shot
And I gave it all I got
Close isn't close enough
Yeah
So I keep trying not to let the long nights
Keep me from looking up to depressed skies
But you're all I ever want

Oh you're like a
Melody
I can't get out of my head
It's a remedy
Something I wanna give all of my time
Your green candy eyes
Get locked onto mine
In another life

You take it in
From up on top of the world
Tell me anything
No one and nothing could change how I feel
Used to fall from the sky
And feel so alive
In another life

You take it in
From up on top of the world
Tell me anything
No one and nothing could change how I feel
Used to fall from the sky
And feel so alive

In another life
In another life
It's me and you
In another life
