

Wolves Or Foxes

Edwin Raphael

Your lungs need filling now
But summer's far away
You swore you wouldn't fall for me
Or someone by the likes

And the rains won't hurt you
And the rains won't let you down anymore

Look at us now
We're taking winter storms
Look at us now
We're taking all we want

The wolves are coming out
And you're not gonna hide
The foxes are coming out
And you're not gonna hide

The wolves are coming out
And you're not gonna hide
The foxes are coming out
And you're not gonna hide

And the rains won't hurt you
And the rains won't let you down anymore
