

## Close Your Eyes

Edwin

To everyone out there  
I think that you should know  
While you're standing in the center  
As the star of your own show

The lights come on and the juices flow  
You smile and wave and then you have to go  
They'll be eating from your hands  
You know you're in control

So close your eyes  
Overdosing on the high you ride  
The sounds and the sights  
Of the world you love, dragonfire wonderland

You look around and they're watching you  
Taking notes on everything you do  
Behind the shades that block the sight of what you really did last night

So close your eyes  
Overdosing on the high you ride  
The sounds and the sights  
Of the world you love, dragonfire wonderland

So close your eyes  
Overdosing on the high you ride  
The sounds and the sights  
Of the world you love, dragonfire wonderland

Close your eyes  
Overdosing on the high you ride  
The sounds and the sight  
Of the world you love
