

## Your Mama Warned You

Eels

Your mama warned you, she was probably right  
Said I be trouble all day and all night  
She said my kind is not to take an old kind  
She told them better was out there to find  
Your mama warned you and she doesn't needs words  
A life with him high that's for the birds  
She said you listen and you take it from me  
You just can't be what he needin to be  
But you can't believe everything she says  
There's a home called heaven within my head  
You know that I mean well

Your mama warned you with an arrogant tone  
Don't be a fool girl leave him alone  
She so superior and so she just think  
But I don't trust someone who's eyes never blink  
No, you can't believe everything she says  
There's a home called heaven within my head  
You know that I mean well

All the things she'll never understand  
I'll know she'll never be a fan  
But she's not you

Your mama warned you, she was probably right  
Said I be trouble all day and all night  
She said my kind is not to take an old kind  
She told them better was out there to find  
And you can't believe everything she says  
There's a home called heaven within my head  
You know that I mean well  
Your mama warned you.
