

And you leave me here
Among the vines
Without a path
Far to close to the ravine

You said don't turn back
I said I'll try
I followed you through
I followed you down
So far down

I've given everything
And everything is broken now
I followed you through
I followed you down
And everything is broken now

You said I'd feel it in my legs
I said ok
I followed you through
I followed you down
So far down

Scrape the dirt from my nails
I know you're under there
Smear the dirt in my eyes
I know you're back there

I heard you say
We all need a little trauma baby
Everyday to know we're alive

I may have followed you down honey
Breathed in the lies
With the dirt from your ground
Gave everything but I'm still alive
I'm still alive...
